## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 4-12 are currently under examination, wherein claims 4, 7 and 10 have been amended in applicant's amendment filed on August 7, 2008.

### ***Status of Previous Rejections***

2. The previous rejections of claims 4, 7 and 10 under 35 U.S.C. 102(b) and the previous rejections of claims 5, 6, 8, 9, 11 and 12 under 35 U.S.C. 103(a) as stated in the Office action dated May 22, 2008 have been maintained.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4, 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jurmann (US 5,167,735) as stated in the Office action dated May 22, 2008.

With respect to the amended features of the instant claims 4, 7 and 10, Jurmann ('735) discloses the oxygen content in the annealing furnace is monitored and regulated during heating to maintain the oxygen content of less than  $1 \times 10^{-5}$  in the furnace (col. 2, lines 46-53)

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1793

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 6, 8, 9, 11 and 12 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Jurmann ('735) in views of JP 57-035620 as stated in the Office action dated May 22, 2008.

### ***Response to Arguments***

5. The applicant's arguments filed on August 7, 2008 have been fully considered but they are not persuasive.

First, the applicant argues that Jurmann ('735) teaches preventing and controlling formation of boron oxide by subjecting metal to a deoxidizing pre-treatment and not by lowering the partial pressure of steam in the furnace to less than  $1 \times 10^{-5}$  during heating as claimed. In response, see the reason of rejection of the amended features of the instant claims 4, 7 and 10 as stated in the paragraph 3 above. Jurmann ('735) clearly anticipates the claim limitations of the instant claims 4, 7 and 10.

Second, the applicant argues that JP ('620) does not disclose the target value of the partial pressure of oxygen in the furnace, nor does JP ('620) teach or suggest a partial pressure of steam. In response, the examiner notes that the ground of rejection of the claimed features relies on the teaching of Jurmann ('735) rather than the teaching of JP ('620).

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1793
